1 Introduction

This document acts as a user guide for someone who will be also performing administration functions (i.e. it's not for the general public). It will identify features of each page, and how to perform all the actions required to maintain and update the website.

2 Home Page & Login

2.1 Home Page

Figure 1 shows the home page as viewed when not logged in.

Marker **1** links back to the home page, Marker **2** navigates to the Latest News area (Section 3), Marker **3** to the Casualty Index (Section 4), Marker **4** to the Articles area (Section 5), Marker **5** the Search area (Section 6) and Marker **6** to the Contact Us page. At the bottom of the page, these links are reproduced, with the addition of Marker **7**, which navigates to the Login page (Section 2.2). These two menu bars appear on every page.

Other areas on the page are the latest news article (Marker **8**), the list of casualties who died today (Marker **9**) and the main narrative (Marker **10**).

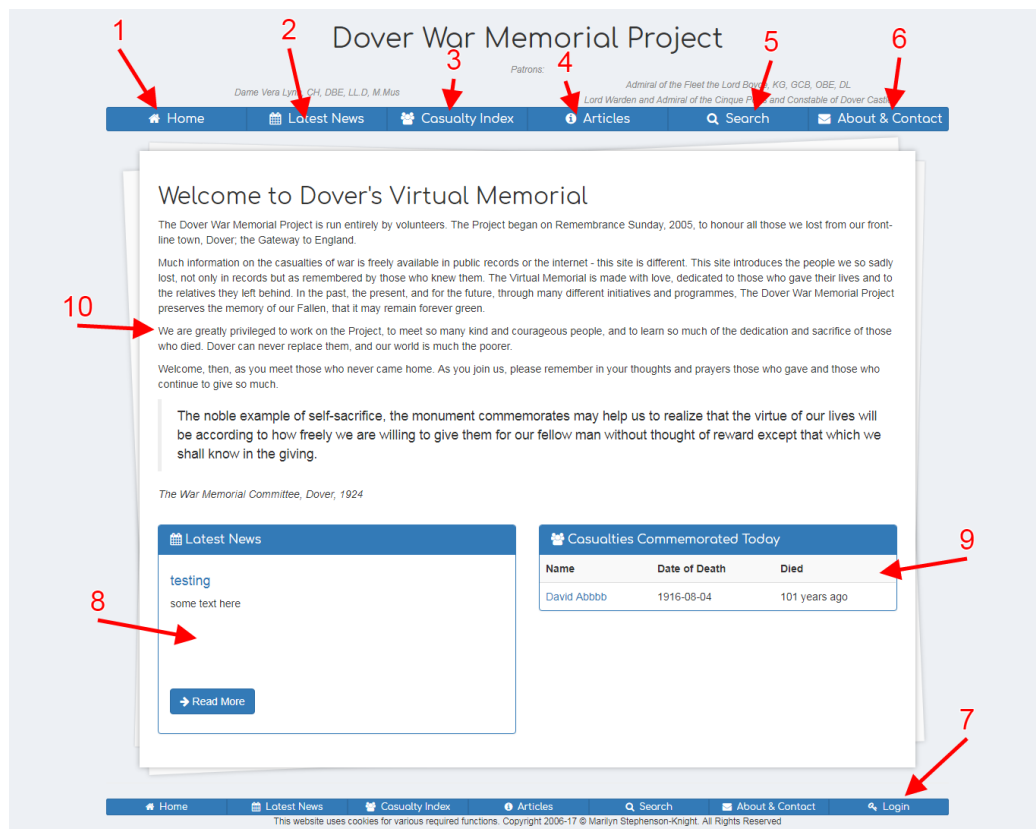

Figure 1: Home Page

2.2 Login

This page (Figure 2) allows the user to login to the site to make various changes. Marker **1** is where the username must be entered with Marker **2** being the password field. Marker **3** submits this information.

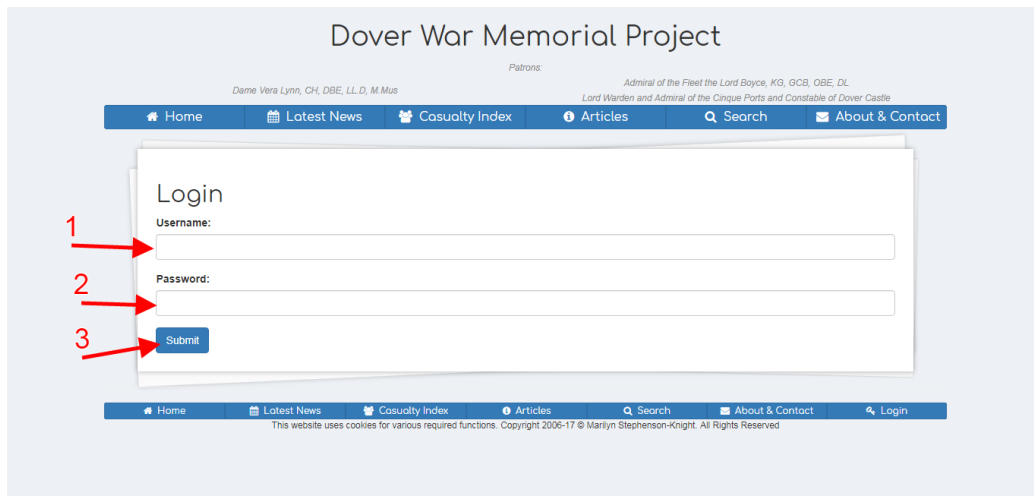

Figure 2: Login Page

2.3 Home Page after Login

Once a user has logged in, menu bars change. The top menu bar gains another row, with the login button on the bottom bar being replaced with a logout button, as can be seen in Figure 3. Marker **1** shows the currently logged in user, Marker **2** navigates to the config page (Section 7) and Marker **3** the admin help page (where this document is stored). Marker **4** and Marker **5** allow the user to logout. Marker **6** allows the user to edit the narrative text. These appear in numerous places across the site.
